

Deutsche Bank Aptitude & Situational Judgement Test (SJT) Walkthrough

Based on Real Assessments Used in 2025 Application Cycles

Overview

Deutsche Bank's early talent pipeline involves:

1. Online Application
2. Online Assessment (Aptitude + SJT via Aon or SHL)
3. HireVue Interview
4. Assessment Centre or Final Round Interviews

This guide focuses on **Stage 2**, where most applicants are screened out.

Section 1: Numerical Reasoning Aptitude – Walkthrough with Sample Questions

Format:

- 12–18 questions
- Time-limited (approx. 60–90 seconds per question)
- Data interpretation (charts, tables, ratios, currency conversions)

Sample Question 1: Interpreting Revenue Charts

You are given a chart showing Deutsche Bank's quarterly net revenues across four business divisions (IB, CB, GM, and Asset Management).

Question:

If Investment Banking revenue rose by 15% from Q2 to Q3, and Q2 revenue was €1.8bn, what was the revenue in Q3?

Answer:

$$1.8\text{bn} \times 1.15 = \text{€}2.07\text{bn}$$

✓ Sample Question 2: FX Conversion

Deutsche Bank's London office reported £3.6m in revenue. What is this in EUR, using an exchange rate of £1 = €1.17?

Answer:

$$3.6 \times 1.17 = \text{€}4.212\text{m}$$

✓ Sample Question 3: Percent Change

If Deutsche Bank's credit trading revenue dropped from €550m to €495m YoY, what is the percentage decline?

Answer:

$$(550 - 495) / 550 = 0.10 = \text{10\% decline}$$

✓ Tips for Numerical Aptitude:

- Brush up on ratios, percentages, and multi-step logic
 - Practice under time pressure (SHL, AssessmentDay, JobTestPrep)
 - Use on-screen calculator only when essential
-

Section 2: Situational Judgement Tests (SJT) – Deutsche Bank-Aligned Scenarios

Format:

- Scenario-based judgement
- Choose the most and least effective responses

- Aligned with Deutsche Bank's core values: Integrity, Collaboration, Client Centricity, and Agility
-

✓ **Scenario 1: Handling High-Pressure Teamwork**

Situation:

You are a summer analyst on a live pitch. A VP asks for a model update by 10 a.m., but you're also assigned to prep client profiles for a different team due at noon.

Options:

- A. Prioritize the VP's request, then rush the profiles after
- B. Let the other team know of the time conflict and renegotiate deadlines
- C. Ask another intern to complete the profiles for you
- D. Do both without asking for help, even if both are incomplete

Most Effective: B

Least Effective: D

Why: Renegotiating timelines shows professionalism and prioritization. Delegating without clarity or producing poor-quality work under pressure risks client outcomes.

✓ **Scenario 2: Ethical Challenge in Analysis**

Situation:

You notice a senior analyst included outdated data in a client deck. The meeting is in two hours.

Options:

- A. Ignore it – you assume they've reviewed it
- B. Quietly fix the data without telling anyone
- C. Flag it respectfully to the analyst and offer to update it
- D. Alert the client directly after the meeting

Most Effective: C

Least Effective: D

Why: Deutsche Bank's value of integrity means flagging the issue proactively to the team, not externally. Silent corrections or direct escalation breaches internal process.

✓ **Scenario 3: Cross-Cultural Collaboration**

**Situation:**

You're on a virtual intern project team with members across Frankfurt, Singapore, and New York. One colleague constantly speaks over others in meetings.

Options:

- A. Raise the issue privately and ask them to consider giving space
- B. Call them out publicly during a meeting
- C. Ignore it to avoid conflict
- D. Escalate directly to the HR contact

Most Effective: A**Least Effective:** C

Why: DB values inclusion and respectful communication. Direct, private feedback encourages a collaborative fix and shows maturity.

 Scenario 4: You've Made a Mistake**Situation:**

You sent an incorrect figure in a model used in a pitch. The meeting is already underway.

Options:

- A. Immediately email the analyst and propose a correction slide
- B. Wait to see if the client notices
- C. Don't say anything – the numbers look close enough
- D. Send an apology to the entire team after the meeting ends

Most Effective: A**Least Effective:** C

Why: Transparency and accountability are core to Deutsche Bank's culture. Quick action with a proposed solution shows reliability under pressure.

 Scenario 5: Juggling Stakeholders**Situation:**

You're supporting both a corporate banking and investment banking team. Both ask for updates at the same time.

Options:

- A. Tell both you're unavailable and log off for a break
- B. Choose one at random and delay the other
- C. Communicate with both, propose revised timelines based on urgency
- D. Ask your buddy to handle one team's request without checking

Most Effective: C

Least Effective: D

Why: Effective communication and stakeholder management are crucial. Escalating or ignoring without communication reflects poorly.

SJT Success Tips

- Understand DB's values from the careers site and apply them
 - Look for answers showing:
 - Integrity and accountability
 - Client-first mindset
 - Teamwork and empathy
 - Clear communication under pressure
 - Avoid extreme actions: blind obedience, ignoring issues, or escalating prematurely
-

Final Notes

- ✓ Aptitude and SJT performance often determines who progresses to the HireVue stage
 - ✓ Deutsche Bank seeks candidates who reflect commercial awareness, sound judgement, and integrity
 - ✓ Prepare using realistic tests, and reflect on how you'd act under pressure
-
